www.lightfieldslugs.com

Thank you for considering Lightfield Less Lethal. We are striving to provide our Wildlife Management customers with innovative and affordable ammunition for the 12 gauge platform. Our wildlife control line has four loads that should meet almost any situation a wildlife professional might encounter.

Lightfield patent pending slug designs are available in mid and extended range loads. These slugs provide superior range and accuracy when compared to competing products. Lightfield also offers a mid-range Twin Ball load and a high velocity rubber buckshot load for closer ranges. Our patent pending 'Star' loads from Lightfield Law Enforcement have also been used with great acclaim at very close range as bear are being released from culvert traps.

Lightfield Wildlife Control ammo has been tested on bear and large ungulates across the country by wildlife professionals with nothing other than positive responses and has been adopted for regular use by state wildlife and law enforcement agencies. Aversive conditioning can now be safely and effectively accomplished at distances not previously possible.

Lightfield Less Lethal is priced to allow wildlife management agencies to deploy the cost efficient 12 gauge platform in the field for aversive conditioning programs. We understand that training and qualifications can be expensive. Lightfield has dramatically reduced the cost for training, qualification and use in the field.

Wildlife Control						
Load	Part #	Velocity	Total Proj. wt	Proj. color	Min. distance	ft/lb ME
HV Rubber Buck	WRBS-12	700 fps	(21) 120 gr.	Black	8 yds.	149 / 21
Twin Ball	WMDB-12	700 fps	(2) 120 gr.	Orange	20 yds.	112 / 2
Mid-Range Slug	WMRS-12	550 fps	130 gr.	Black	20 yds.	103
Ext-Range Slug	WERS-12	650 fps	130 gr.	Blue	40 yds.	141
